Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Wednesday 01 Sep 2021 until 23:59 on Thursday 02 Sep 2021

Forecast Issued on Tuesday 31 Aug 2021 at 14:57

Confidence: High for dry and settled conditions to persist throughout the remainder of the week. Lower confidence regarding cloud details and the extent of any overnight low cloud and fog. Low confidence in the timing of the change to a more unsettled, wetter and windier spell of weather this weekend.

Headline for Wednesday 01 Sep 2021: Some fog patches during the early hours. Dry but cloudy throughout the day.

Forecast for Wednesday 01 Sep 2021

Weather: A chance of some isolated early morning mist and fog patches with the odd spot of drizzle. Once these clear it will be another dry but often cloudy day, especially during the morning. Brighter periods are possible by the afternoon, more especially in the west, with a chance of some sunny intervals.

Chance of cloud free mountain/hill tops above 600m: 20% increasing to 80% by the afternoon.

Visibility: Poor or very poor in some areas first thing with periods of cloud between 500m and 800m, mainly in the east. This will lift to become periods of cloud above 800m by the afternoon. Below the cloud, visibilities will be very good.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A mostly cloudy day and a brisk north-easterly wind will make it feel cool at the summits particularly around sunrise. Therefore if you expect to spend significant time walking/hiking on peaks and summits ensure you have an extra layer.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Thursday 02 Sep 2021

Weather: Isolated mist and fog patches with the odd spot of drizzle are possible again to start Thursday. Once these clear it will be a dry but cloudy day, though cloud breaks will develop into the afternoon and evening.

Maximum wind: Easterly 15-20 mph with gusts of 25-30 mph.

Chance of cloud free mountain/hill tops above 600m: 20%, increasing to 80% by afternoon.

Visibility: Poor or very poor in some areas first thing with periods of cloud between 400m and 800m, mainly in the east. This will lift to become occasional periods of cloud above 800m by the afternoon. Below the cloud, visibilities will be very good.

Temperature: **Valleys:** Plus 11 Celsius, rising to Plus 18 Celsius by the afternoon.
At 600m: Plus 09 Celsius, becoming Plus 12 Celsius.
Freezing level: Above the summits.
